

RiskAssistant

Fully hosted and web based, RiskAssistant is the most advanced driver management software currently available incorporating driver control, risk assessment and duty of care management for company or employee owned vehicles.

Key benefits

- Record employee owned vehicle details
- Key documentation and event management
- Risk management
- Driver endorsement recording
- Insurance document management
- DVLA licence checking
- Additional drivers
- Duty of care policy parameters
- Scheduled event tracking and reminders
- Standard reports

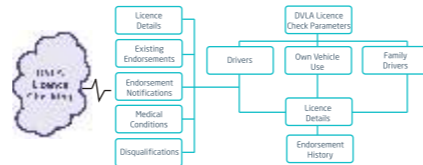

FleetAssistant

The ultimate system to manage cars, vans and commercial vehicles, FleetAssistant combines vehicle management functionality with the features available in RiskAssistant. Ideal for small fleets, FleetAssistant is a fully hosted web solution designed to deliver improvements in efficiency, information availability and management control.

Key benefits

- Vehicle driver allocation history
- Vehicle scheduled event tracking and reminders
- Vehicle technical information
- Servicing and maintenance management
- Accident management
- Purchase invoice control
- Fuel cards
- Suppliers terms
- P11d reporting
- Standard reports

Key2 DVLA Licence Checking

Key2 DVLA Licence Checking is a web based electronic driver licence checking service with the DVLA. Batch licence check requests will be sent automatically depending upon the risk profile of the driver. Periodic checks will be carried out at a frequency of your choice, which will return the following details:

Key benefits

- Licence commencement date
- Expiry date
- Category
- Restrictions
- Conviction dates
- Offence dates
- Offence code
- Points
- Disqualification until date
- Medical conditions

Key2 Quotes

Using 'next generation' technology, Jaama are able to connect fleet operators and their drivers to contract hire quotations, automatically tailored to the drivers vehicle band and fleet policy.

Key benefits

- Target rate finder
- Unlimited multiple quote comparisons
- Total cost of ownership rates
- P11d rates
- Automatic driver band filters
- Intelligent, rule based factory options
- Standard accessories
- Vehicle technical specification
- Customer dealer options
- Manufacturer support terms
- Contract hire
- Hire purchase
- Finance lease
- PCP

Key2 Vehicle Management

The management of processes, monitoring of costs and measuring of efficiency are all vital factors for any fleet operation. Key2 Vehicle Management is the world's most advanced vehicle management system incorporating functionality to manage all aspects of acquiring, operating, maintaining and disposing of vehicles for even the most complex fleet operation.

Key benefits

- Scheduled event tracking and reminders
- Vehicle management
- Electronic vehicle ordering
- Servicing and maintenance management
- Accident management
- Fuel cards
- Reports and management information
- Defect management
- Tyre management
- Operator licence control
- Roadside inspection
- Vehicle depreciation
- Associated special equipment
- Tachograph and speed limiter management

Key2 Workshop Control

Key2 Workshop Control delivers powerful and flexible operational management handling all aspects of running stores and busy workshops. In-depth performance analysis provides the ability to monitor and control vehicle repairs, inspections and servicing, with real-time technician availability and efficiency.

Key benefits

- Control over local and remote workshops
- Vehicle downtime analysis
- Job booking
- Monitor workshop loading
- Standard jobs
- Control of ordering just in time parts from jobsheet
- Ability to easily rebook incomplete jobs
- Automatic updating of inspection, service and tachograph calibration schedules
- Technician hours and efficiency monitoring real time as it happens
- Definable charging rates
- Links to financial accounting systems
- Interfaces with bar coding readers

>>> JAAMA CELEBRATES TWO-YEAR ANNIVERSARY WITH EXPANSION

>>> JAAMA'S BIG PLANS

FAST-GROWING fleet software and risk management expert Jaama is embarking on a major expansion programme that will see the recruitment of a further six members of staff and a move to larger premises.

Launched two years ago, West Midlands-based Jaama has taken the car and commercial fleet management market by storm with its unique combination of sophisticated web-based vehicle management software and risk management services to fleet operators, leasing and rental companies.

This year the company is forecasted to breakthrough the £1 million turnover mark and major customers include mobile phone group Caudwell Holdings, Newtown Vehicle Rentals, SIG Plc, Smeg and British Transport Police.

With its flagship Key2 Vehicle Management system covering all aspects of managing, maintaining and operating vehicles which is designed for medium and large fleets; FleetAssistant for smaller fleets; a range of duty of care products under the Key2 Risk Management and RiskAssistant brands; a new information-packed at-work driving website - www.key2roadsafety.co.uk - and monthly risk management seminars that have been attended by more than 500 fleet decision-makers, Jaama has put a

number of the UK's largest and best known companies on the road to controlling and managing vehicles effectively and efficiently.

Managing director Jason Francis said: "Jaama was launched because existing technology providers were stuck in the software development slow lane. All our products are internet-based fleet management solutions that provide greater integration and automation than ever before.

"The level of interest has far exceeded our expectations and this has led to earlier than planned expansion. Already this year we have recruited an additional seven members of staff.

"For small, medium and larger fleets operating all types of vehicles from superminis to dustcarts, MPVs to trucks we have the technology to significantly improve management and cost control whilst reducing day to day administration. Data management is simplified by linking with numerous external information providers, such as the DVLA, CAP, Glass's Information Services and the Vehicle and Operator Services Agency.

"As Jaama continues to expand and increase its customer base we will continue to be the leading innovator in our industry by being the first to launch new features and initiatives that will boost vehicle

management control. Our credentials in this area have recently been confirmed with two awards this year for innovation and excellence."

Mr Francis added: "The pace of technological developments and our rapid customer growth means that we are initially looking to fill a further six posts before embarking on a second expansion phase next year. This means that we are now also looking to move to larger premises."

Jaama, which currently employs 26 people, is looking to fill posts covering project management, software development, customer support and training.
